

Impact starts here.

Reflection on 2025

2025 was a year of impact and innovation at Impact Hub Dhaka. We wrapped up Springboard Programme 7.0, co-hosted the 9th Social Business Youth Summit (SBYS), hosted a Startup Ecosystem Dialogue with UNDP Bangladesh, successfully completed the BEAM Program in partnership with MetLife Foundation, Access Bangladesh and Impact Hub network. We also marked our 5th anniversary this year, celebrating five years of impact and directly empowering over 6000 enterprises across 27 districts, with 71% women participants. Adding to this milestone year, we expanded our presence with a new Banani hub, creating more space and opportunities for innovation, collaboration, and community.

A New Chapter Begins in Banani

We are stepping into an exciting new chapter with our Banani hub, opening up more opportunities for innovation, collaboration, and community. With expanded space and new possibilities, the Banani hub brings entrepreneurs, changemakers, and collaborators together in a vibrant environment to connect, co-create and make ideas happen.

Impact Hub Dhaka joins Makers Festival 2025

We were proud to be part of the Makers Festival 2025, where we presented how inclusive design can shape spaces that are truly accessible for all. Under the theme "Celebrate. Consolidate. Elevate." and guided by the metaphor "Harvest in the Valley", the Festival invited our global network to reflect on our journey of impact, from mountain-top ideas to the valleys where change takes root. Over three days, the gathering honored collective achievements, deepened collaboration, and elevated the ways we work across Hubs. As part of a global celebration of creativity and connection, the Festival showcased the strength of our community and the shared commitment to grow, learn, and thrive together.

Glimpse of our presence at the Makers Festival 2025

"Community Voices for Change" Brings the Community Together

On 24 November 2025, Impact Hub Dhaka hosted "Community Voices for Change", an engaging discussion on the sustainability topic: "Zero-Waste Living is an Unrealistic Goal in Modern Society". Speakers shared diverse perspectives, debated strategies for waste reduction, and challenged each other's ideas, sparking thoughtful dialogue on building a sustainable future. The audience actively joined the conversation, sharing their questions and perspectives, making the session both interactive and thought-provoking.
